Mark,

Look forward to seeing you.

If it's not too weird - - you are welcome to stay with me and my husband. Ex. 6 - Personal Privacy My commute is 30 minutes by SEPTA train. Wallingford/Swarthmore and Media are much more low key, and definitely not as private, than Philadelphia. Whatever....

-Bonnie

PSC Orders West Virginia American Water to Continue Water Extension Projects

The Public Service Commission of West Virginia has ordered West Virginia American Water Company (WVAWC) to continue to work with certain public entities to provide access to public water to areas that do not currently have it. The projects would extend existing facilities and bring water to new customers.

In October 2011, the Regional Development Authority of Charleston-Kanawha County, Lewis County Economic Development Authority (EDA), Oakvale Road PSD, Lashmeet PSD, New Haven PSD, Putnam County Building Commission, Jumping Branch-Nimitz PSD, and Webster County EDA (jointly the Complainants) filed a complaint asserting that WVAWC improperly withdrew from a series of partnerships to expand water service in various West Virginia areas. The complaint was filed after each of the organizations received a “decommitment” letter from WVAWC saying it would no longer financially support public/private investments, may not provide operation and maintenance services for future extensions, but may serve new projects through a master meter using WVAWC’s wholesale tariff rates or operate and maintain such projects subject to a detailed project cost evaluation. The Complainants characterized the actions of WVAWC as an unreasonable practice adopted because of adverse rulings by the Commission in a contested rate proceeding. The Complainants also contended that they gave up their ability to operate their own infrastructures as well as opportunities to obtain certain federal funding because they believed that WVAWC would continue to participate in future extension projects.

In today’s Order, the Commission stated that WVAWC has an obligation to continue to participate in technically and economically feasible extension projects proposed by the Complainants. The projects would serve new customers who are located within areas that could reasonably be served by WVAWC. The Order also stipulates that WVAWC must continue to file quarterly reports with the Commission, providing statistical information about the amount of non-revenue water and unaccounted for water, miles of lines surveyed, average response time, number of boil water advisories, number of leaks repaired and number of meters tested for each size of meter. These quarterly reports will be required through 2015. WVAWC will also be required to share this statistical information with the Complainants.

More information, including a copy of the Commission Order, may be obtained from the PSC website: www.psc.state.wv.us and referencing Case No. 11-1451-W-C.
